

A
TOPOGRAPHICAL MAP
of the
STATE OF NEW HAMPSHIRE.

Surveyed under the Direction
of
SAMUEL HOLLAND Esq^r
Surveyor General of Lands
for the
NORTHERN DISTRICT OF NORTH AMERICA;
BY
the following GENTLEMEN His Deputies
M^r THOMAS WRIGHT, M^r GEORGE SPOULE, M^r JAMES GRANT
M^r THOMAS WHEELER & M^r CHARLES BLASKOWITZ.

LONDON:
Printed for WILLIAM FARMER, Geographer to the King,
Charing-Cross March 1784.

ADVERTISEMENT

The respective parts of this Plan were surveyed by the several Gentlemen concerned with all possible accuracy and afterwards rectified by Samuel Holland Esq from the Astronomical Observations made by him at Portsmouth, Waverth House, Newbury Port and Cape Shore and those made by M^r Wright at Hillsdale and the Pine Tree at Dracutt.

By these Surveys the adjusted form of the Province is exactly determined except as to its Eastern Boundary-Line, which is laid down with the several Parts dependent thereon, from such materials as were given in. Whatever relates thereto to that Line, must depend on their authenticity and goodness.

The Boundaries of the several Townships and Parishes were delineated from Descriptions in the Public Offices or Surveys made for the use of the State and the Particulars in command. It is possible some Tracts which were granted or patented at the creation of this Plan are omitted, should there be any such it must be attributed to the necessary materials for describing them not having been sent in. Which is also the reason that some Townships appear more completely laid down than others that are populous as well settled.
