

Pemigewasset River Local Advisory Committee

Date: September 30, 2014

Time: 7:00 PM

Location: Pease Public Library - Plymouth, NH
1 Russell Street (off of Highland Street)
(Downstairs Meeting Room)

7:00-7:05

Minutes

Review and approve minutes from August 26, 2014

7:05-8:00

Stormwater Management

- Review feedback from member discussions with PBs regarding “net zero post vs. pre-development stormwater runoff” as they apply to new projects
- Discuss how key elements of *The Homeowner’s Guide to Stormwater Management* could be adapted to all site plan reviews including building permits:
 - Formula: Estimate how much stormwater your property creates (hard surfaces) assuming a 1 inch rain event:
$$\text{Impervious Areas (ft}^2\text{) x (1 inch rain)/12} = \text{Stormwater Volume ft}^3$$
 - Stormwater in gallons is determined by multiplying above cu. ft. by 7.5 gallons per cu. ft.
 - Next, select from menu of “Treatment Practices” designed to capture the volume of stormwater calculated. (This is easily determined without a licensed professional engineer).
- Discuss better options that may be in use or proposed elsewhere.

8:00-

Other

- Town Budgets, request for PRLAC funding needs to be submitted to corridor towns by ~ 10/1
- PRLAC income/expense statement for 2014 (LRPC)
- Discuss possible changes to meeting schedule/effort in 2015
 - Do we need October meeting?
- Permit Applications - process review being conducted by DES Objectives.
- *Conservation Matters* article
- Member input – what’s happening in various towns
