Take a look at ideas, projects and products originating in New England. Our innovations began in colonial times, thrived during the Industrial Revolution and remain on the cutting edge. Listen to songs from different eras and see images of the machinery and goods. What was made in YOUR community?

"Anne is a musician, historian and writer who **LOVES** sharing information! She was an editor and reporter at perhaps the newest newspaper in New England, The Concord Bridge. She is the author of Fitchburg: the old hometown. Music is her first love." -anneoc.com
