Join us at the Blackstone Public Library for this wonderful and informative presentation given by Debra Vescera, MSN, BSN, RN, and the Regional Public Health Nurse with the Blackstone Valley Partnership for Public Health.

During this presentation patrons will learn of the types of Hoarding Disorders (HD), the definition, and the etiology of the illness.

Debra will also explore the health impacts that HD can have on the person, their family members, and their community, as well as the resources available to assist those struggling with the disorder.

Anyone interested in learning more about this complex mental health disorder is welcome to attend!

Registration is required. Visit our Events Page.
