

## Paper Weaving

1. Take two pieces of construction paper.
2. Take the first piece of paper and fold in half along the long edge.
3. Cut through the fold and go just to the end without cutting through. You can cut as many slits that you like. The more slits you make that harder to weave.
4. Take your second piece of paper and cut it into strips.
5. Weave the strips through the piece of paper with the slits. Go over and under until there is no room for more strips. There will be some strips left over.
6. Tip: If you decide to make wavy strips, weave them as you cut them out. This way you don't get mixed up.
