

Frozen Apple Dog Treat

From irresistablepets.com

Ingredients

2 Apples

1 Cup Greek Nonfat Plain Yogurt

Water

This recipe makes 16 treats if using a standard ice cube tray.

Instructions

1. Slice 2 apples into small pieces but remove the seeds and the core.
2. Mix the apple slices, yogurt, and a splash of water in blender and blend until you get a liquid consistency.
3. Pour the mixture into an ice cube tray and freeze for a few hours or until hard.

I recommend only feeding your dog one “cube” at a time. You can put the left over treats into a Tupperware container and store them in the freezer.
