### Seed Library

Many public libraries across the country are creating Seed Lending Libraries as a way to reclaim seed as a resource for local food. The Sutton Library is in the process of setting up our own seed library. The goal is to offer patrons heirloom/organic seeds to "borrow", grow, and at the end of the season, to have patrons return some of the seeds from the healthiest plants. Those seeds would be made available to patrons the following year, and over time, these seeds will produce plants that are locally adapted and healthier sources of food for our community. If you are interested in learning more about this project or would like to become involved by sharing your garden wisdom, please let us know. We would appreciate any help!

### Food for Fines and Summer Reading Tickets

During the month of July 2014 the Sutton Public Library and the Sutton Food Pantry invite you to pay off your library fines with food. For each non-perishable item that you bring in to the Library \$1.00 in fines will be taken off of your library card and you will receive a ticket for the summer reading raffle prizes! Fines must be Sutton Public Library fines, not fines from other libraries. Food for Fines cannot be used to pay for missing, lost or damaged items. All items will be donated to the Sutton Food Pantry.

### Where is Robot Reading?

All summer long we're going to do our own version of Flat Stanley called 'Where is Robot Reading'? Come in and borrow a robot and take it on home, around town, or on vacation and take pictures with it! We've got maps of the United States and the world to track the travels of Robot and see where it goes!

### Sutton Schools Summer Reading

The Sutton Library is your destination for school required reading. Summer reading books are set aside so that you can find them easily. Remember that we can always borrow something from another library for you, it only takes a few days to get here! We'll have links to the lists and assignments posted on our website as soon as they are available.

### Worm Composter

As part of this summer's science themed reading programs we have built our very own worm composter. We'll be talking about how worms benefit the soil and how they make compost out of food scraps while we watch them work. Check our website for more info about this fascinating project.

# Adult Programs

## Introduction to Zentangle

Thursday, July 31 from 6-8 pm

This two-hour workshop is a basic introduction to the Zentangle drawing method. Class will cover the history, the applications, and the steps of creating an original Zentangle tile. This class invites all levels and requires no artistic experience. This is a great starter class that is bound to leave you thirsty for more.

*Funded by a gift from UniBank.*

## Tangle, Bangle, Bracelet

Thursday, August 7 from 6-9 pm

This Zentangle inspired class will guide you through the process of creating a truly unique piece of jewelry. Students will work on wood blanks and add tangles with a pen and pencil. Finished pieces will be clear coated. Students will choose a type of bracelet to work on from a variety of different styles from bangles, cuffs or beads.

*Funded by a gift from UniBank.*

## County-Wide Read

Libraries across Worcester County have joined in the celebration of the Worcester Revolution of 1774 to bring Ray Raphael's "First American Revolution: Beyond Lexington and Concord" to the region.

*The Spirit of '74 County-Wide Read* is part of the year-long effort to recognize the 4,622 militiamen from 37 towns of Worcester County who marched down Main Street in Worcester, shut down the Crown controlled county courthouse and, for the first time ever in the American colonies, effectively overthrew British authority to become independent. The date was September 6, 1774. Not a shot was fired.

The read will culminate on September 7, 2014 with a free, day-long event in downtown Worcester for families and the general public. The date is set to align with the 240th anniversary of the event and will include re-enactors, craftsmen, and others in period dress with demonstrations of colonial activities and life. Ray Raphael, the author of the book, will meet with participants to answer questions and sign copies of his book on September 7.

The celebration of the Worcester Revolution of 1774 is made possible in part by generous grants and support from the Greater Worcester Community Foundation, Massachusetts Society of Colonial Wars, MassHumanities, and the Worcester Arts Council.

The Sutton Public Library is proud to take part in the County-Wide Read. Book discussions will be held on:

- \* Thursday, July 24 at 6 pm
- \* Monday, August 4 at 12:30 pm  
at the Sutton Senior Center
- \* Tuesday, August 12 at 6 pm

Books can be picked up at the Front Desk of the Library or at the Senior Center.

## **Owl Pellet Dissection** Ages 7 and up

Friday, July 18 at 11 AM  
Wednesday, July 30 at 4 PM  
What's an owl pellet? Owls, like many other birds, eat their food whole. They use their strong, sharp beaks to rip their prey apart and then swallow chunks whole. The owl slowly digests its meal by separating the softer materials (like meat) from the harder stuff (like bones). It then regurgitates the harder material along with indigestible items such as feathers and fur in the form of a pellet. We will dissect the pellets and see what was eaten!

## **Make a Marshmallow Shooter** Ages 8 and up

Tuesday, July 22 at 11 AM

### Galileo: *The Starry Messenger* Show

Monday, July 14 at 1 PM

Ages 10 and up

Sutton Senior Center; no registration required.

Come meet Galileo! To many the Universe is a closed book of secrets never to be read. Almost four hundred years ago, an unknown court mathematician in Italy opened that book and laid the foundation for modern science. Galileo Galilei turned his telescope to the heavens to discover mountains and craters on the moon, four moons of Jupiter, and countless stars never

before seen. Even more significant was his method of observation and mathematical analysis. He taught future scientists the way to discover the laws of nature. *The Starry Messenger* is a dramatic fun filled adaptation of Galileo's short treatise *Siderius Nuncius*. Galileo (dressed in 17th century costume) will present a public lecture on his most recent discoveries made using his newly devised spyglass. As he describes those discoveries, Galileo's new method of observation and measurement of nature become apparent. Throughout the presentation, audience members are actively involved in experiments and demonstrations.

*Funded by a donation from UniBank.*
