Grant News: University of New Hampshire's Center for Digital Health Innovation recently received a USDA distance telemedicine grant to serve rural partners, including the Cook Memorial Library. As part of this grant, our library and the Tamworth Community Nurse Association received equipment to help connect local residents to telehealth appointments, virtual meetings, as well as devices to improve communication for in-person and virtual appointments and meetings. This equipment will be available for residents to borrow. The library also received virtual reality headsets preloaded with cognition and mental well-being content which provide immersive experiences designed to relax, distract, and boost mood. The VR headsets will be used for library programming and for people to try out at the library. The grant also provided a full-body virtual reality rehabilitation kit for local healthcare and therapy practitioners to learn about with training provided by UNH faculty and clinical students.
